WORK EXPERIENCE
*(References available
upon request)*

Lister Technologies (P) Ltd, Chennai, India

Software Engineer Intern   Jan, 2013 - Apr, 2013

- Worked on generating reports based on various requirements in the Project Management System, an Open-Source, PHP application for managing and collaborating projects within the organisation, thereby helping to provide deeper insights into day today operations of the company.
- Attended a two week training program on Salesforce.com, a leading CRM(Customer Relationship Management) product.
- Technologies used: *(PHP/MySQL)*

Accenture Services (P) Ltd, Chennai, India

Associate Software Engineer   November, 2013 - January,2014

- Attended training on Project Estimations, Quality Control(QC) and documenting manual test cases for client applications along with training in the basics of Java, HTML, JavaScript, CSS and MySQL.
- Was introduced to automated testing through Quick Test Professional tool. Received training to write automated test scripts in VB and execute them.

HANDS-ON
EXPERIENCE

JustPlay Sports Technologies (P) Ltd, Bangalore, India

Developer intern, playerify.com   July, 2013 - October,2013

- An early stage startup backed by The Morpheus(batch 9) which targets the sports community.
- Built sports event pages with like and recommend features.
- Built a separate rating and review system for venue and ground listings.
- Created a messaging module capable of handling one-to-many text threads.

- Helped pitch the product along with the co-founder to investors and entrepreneurs in open coffee club meetings and startup sessions.
- Took up the resposibility of core development for the above features and the product has about 900 users as of today.
- Technologies used: *(PHP-Yii/MySQL/jQuery+AJAX)*

CMA Hackathon

Participated in CMA Hackathon conducted by ThoughtWorks and built FeedbackIt, a simple platform for providing feedback for various Government services and products.
url : feedbackit.herokuapp.com

Desto Creative Solutions

Helped build a Project management tool called Taskano for Desto Creative Solutions, an IIT incubated startup in Chennai .
- Worked on creating and setting up the Database Schema for the product.
- Wrote a separate portable multi threaded commenting module using JavaScript/AJAX/jQuery to reduce page reloads and to make the feature look seamless.
- Wrote a files module to enable file sharing and uploads.
- Technologies used: *(PHP-Laravel 4/MySQL/JavaScript/AJAX/jQuery)*

HOBBY PROJECTS   ### Twitter Hashtag search

Built a simple Twitter hashtag search app to display tweets based on the input hashtag using Twitter API. Trying to enhance functionality by creating word clouds based on hashtag frequency.
url: github.com/ananth99/TweetCloud

Sentry 2 implementation in Laravel

Made a complete user authentication/authorisation implementation using Sentry 2 in Laravel 4. Trying to enhance the app by writing tests using PHPUnit and making it into a portable Composer package.
url: github.com/ananth99/sentry-laravel

Personal Blog and Website

Created a personal blog and website using Jekyll, a parsing engine for building static websites.
